

EXPERIMENT 5

Aim:

How to View Last Activity of Your PC.

Procedure:

- Use **LastActivityView**, a Windows utility that collects information from various sources on a running system.
- Download and open LastActivityView on the target PC.
- The tool displays a log of various user activities and system events, including:
 - o Application usage
 - o File openings
 - o Software installs/uninstalls
 - o USB device connections
 - o Internet Explorer and other browser
 - o Email clients usage
- Review the log entries to determine the timeline and details of user and system activities.
- Apply filters or search to narrow down specific events or timeframes.

Result:

- LastActivityView successfully captured a detailed log of user and system actions. The chronological event log supported reconstructing user behavior on the PC.
- This information aids forensic investigators in timeline analysis and identifying actions relevant to investigations.
